GEORGE BLUMLEIN IS THOUGHT TO BE "RIPPER" MURDERER.

As in His Examination He Continually Refers to Such Murders and He is Held.

PHILADELPHIA, June 24.—Police authorities and alienists are continuing their examination of George Blumlein, who was arrested here yesterday and whose peculiar actions led the police to suspect that he may be the "ripper" who killed two small children on the East side, New York, some time ago. Two representatives of the New York police department are participating in the investigation.

Blumlein arrived here about two weeks ago with his wife. Blumlein was taken into custody after he had walked up and down in front of police headquarters for several hours. When questioned he told a rambling story and mentioned the "ripper" murders in New York. His familiarity caused the police to immediately notify the New York authorities.

Inspector Joseph Faurot, of New York, said today there was enough in the case to warrant the holding of the man.

GOOD WORK IS DONE IN EAGLE

By County Agricultural Agent, Who Tells Farmers of Crop Rotation.

W. D. Zinn, county agricultural agent, reports another good week in Eagle district where two meetings were held, with an attendance of sixty-five. Twenty-two farmers were also visited and arrangements were about completed for the purchase of a lime pulverizer. At several of the farmers visited the neighbors came in and went over the problems with the agent.

The meeting Saturday was attended by fifty-five farmers and great interest was manifested in the question of "rotation of crops, which was discussed at length. Several new rotations were suggested, among them being rye, crimson clover and vetch. These plants are to be turned down in the spring and the ground sown to soy beans followed by rye. This is a two-year rotation which tends to bring up an unproductive land very rapidly.

Another rotation is corn in which crimson clover and vetch is sown at the last cultivation, the same to be turned down the next spring and followed by corn. Corn stubble should be sown and rye and grass and rye to be moved for hay. This is a rotation that will bring large returns because corn is a profitable crop and at the same time maintain the fertility of the soil.

Still another rotation which might be termed a one-year rotation is rye sown in the fall and turned down and sown to soy beans in the spring. Where the land is fertile the rye may be cut for hay and the soy beans sown. This is a rotation that will give large returns, because two profitable crops may be taken from the soil each year. Where land is handied in this way as a matter of course it must be well fed.

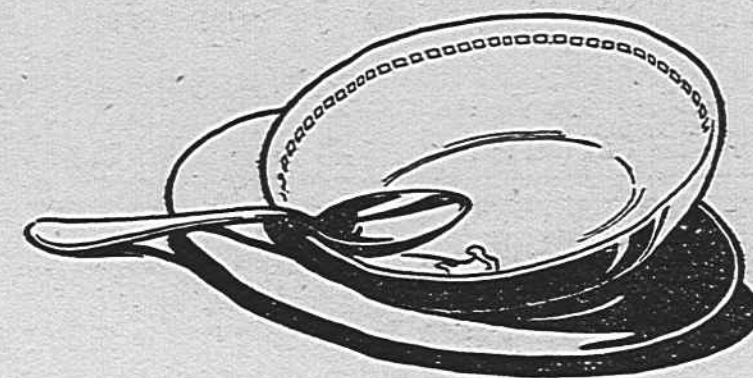

Owing to the fact that a conference of county agents is to be held at Morgantown, June 29, inclusive, the county agent will not be present next Saturday nor will he be in the county during the time mentioned, but after that time, Saturday meetings will be continued as usual.

Mr. Zinn will be in Simpson district for one meeting this week and at McWhorter in Union district for another.

For God's sake get her out." Fearing another demonstration on the part of the convicts, Campbell was today moved from the solitary cell to another part of the prison.
